DELL'INSUBRIA**

DEPARTMENT OF ECONOMICS

DESCRIPTION OF THE TRAINING PATH

(COURSE REGULATIONS)

THREE-YEAR INTERCLASS DEGREE COURSE IN

**ECONOMICS AND INNOVATION AND SUSTAINABILITY MANAGEMENT -
INTEGRATED DIGITAL**

Academic year 2024/2025

I. GENERAL INFORMATION	
DEGREE COURSE.	ECONOMY AND MANAGEMENT OF INNOVATION AND SUSTAINABILITY - INTEGRATED DIGITAL (CLEMISDI)
CLASS	L-18 - Economics and Business Management Sciences L-33 - Economic Sciences
TPOLOGY	Mixed mode degree course: 1/3 in-person and 2/3 online for all classes, with the option to choose the status of "part-time student".
COURSE HEADQUARTERS	Varese
INTERNET ADDRESS OF THE STUDY PROGRAM (CDS))	For information about the training objectives of the degree program, job prospects, entry requirements, admission procedures, expected learning outcomes, training path/curriculum, final exam, you can consult the Annual Unique Sheet (SUA-Cds), published on the course's webpage at the following address: https://www.uninsubria.it/triennale-clemisdi
DEPARTMENT OF STUDY SPECIALIZATION	Department of Economics - DiECO https://www.uninsubria.it/ugov/organizationunit/7955
DIRECTOR OF THE STUDY PROGRAM	Prof. Paolo Zuddas (coordinator)
REFERENCE EDUCATIONAL OFFICE OF THE COURSE OF STUDY	https://www.uninsubria.it/servizi/servizio-di-ascolto-manager-didattici-la-qualità-dieco
SCHEDULE OF EDUCATIONAL ACTIVITIES	<p>The teaching of the Study Programme is scheduled over two semesters:</p> <ul style="list-style-type: none">• 1st semester from 16.09.2024 to 14.12.2024• 2nd semester from 10.02.2025 to 24.05.2025 <p>The exam sessions of the Study Programme are scheduled in the following periods:</p> <ul style="list-style-type: none">• from 28.10.2024 to 31.10.2024 (1st mid-term exam)• from 16.12.2024 to 20.12.2024 (2nd mid-term exam)• from 08.01.2025 to 07.02.2025 (winter session)• from 24.03.2025 to 28.03.2025 (1st mid-term exam)• from 26.05.2025 to 30.05.2025 (2nd mid-term exam)• from 03.06.2025 to 25.07.2025 (summer session)• from 01.09.2025 to 12.09.2025 (extraordinary session) <p>All exams (mid-term exams and exam sessions) are held only in person. To know the dates of suspension of teaching activities and closures of University facilities for national, local holidays, and other closures (Christmas holidays, Easter</p>

	<p>holidays, University closures), the student is required to consult the Academic Calendar approved by the Academic Bodies at the following link:</p> <p>https://www.uninsubria.it/chi-siamo/sedi-e-orari/calendario-didattico-di-ateneo</p>
FURTHER INFORMATION	<p>Restricted access degree program, with admission based on a "first come, first served" criterion according to the chronological order of application submission. For the academic year 2024/2025, there are 220 available seats for the Bachelor's Degree in Economics and Management of Innovation and Digital Sustainability, which will be distributed as follows: 200 seats reserved for Italian citizens, European Union citizens, and non-EU citizens legally residing in Italy, and 20 seats reserved for non-EU citizens residing abroad, including 5 seats reserved for Chinese citizens residing abroad participating in the Marco Polo and Turandot Project. Detailed participation terms will be outlined in a notice published at the beginning of July. Registrations will open, tentatively, in mid-July 2024.</p> <p>The program is delivered in Italian. Classes are held in the evening and/or Saturday mornings.</p>
ADMISSION MODE, INITIAL KNOWLEDGE ASSESSMENT, AND ADDITIONAL EDUCATIONAL OBLIGATIONS RECOVERY (OFA)	<p>In accordance with Ministerial Decree 270/2004, although the course is designed to be accessible to students with basic skills common to all high school diplomas, students enrolled in the first year of the Integrated Study Course in Economics and Management of Innovation and Digital Sustainability (including those who have transferred internally, transferred from another university or have shortened their academic career) must take a non-selective test to assess their initial level of knowledge in basic mathematics.</p> <p>The test is not mandatory or selective for enrollment purposes. Students who apply for a transfer or come from another university in order to enroll in the first year must also take the test, unless they have already passed a Mathematics exam in their previous course of study, even at another university.</p> <p>The test, consisting of multiple choice questions, focuses on basic quantitative knowledge (polynomials, algebraic equations and inequalities, analytical geometry) and is administered through the e-learning platform, following the procedures and deadlines specified on the dedicated detail page.</p> <p>To pass the test, students must correctly answer at least 50% of the questions. On the other hand, if the correct answers fall below this threshold, the student will be assigned an Additional Training Obligation (OFA), which must be fulfilled by passing the test in one of the subsequent sessions and in any case within the first year of the course, according to the timetable that will be published on the dedicated webpage.</p> <p>In order to help students prepare and pass the test, the University Orientation Office, in collaboration with the Study Course, organizes a Preparatory Mathematics Course, which takes place between the end of August and mid-September, before the start of classes. This course is aimed at students who wish to strengthen their previous skills before taking the test.</p>

	<p>For the fulfillment of the OFA, the Study Course provides tutoring services for students, where quantitative tutors are available to help students with specific difficulties. https://www.uninsubria.it/servizi/tutti-i-servizi/tutorato-dieco.</p> <p>The additional training requirement (and consequently the verification of initial preparation) is considered fulfilled if, by September of the year of first enrollment:</p> <ol style="list-style-type: none">1. a grade of at least 12/30 has been achieved in a test, even partial, of the Mathematics I exam (ECO0349); <p>or</p> <ol style="list-style-type: none">2. at least 30 CFU related to first-year courses have been obtained (25 CFU for part-time students). <p>If the training requirement is not met, the student will be enrolled in the academic year 2024/2025 as a "repeating" first-year student.</p> <p>Students are allowed to be simultaneously enrolled in two degree programs according to the provisions of Law No. 33 of April 12, 2022 and the relevant implementing decrees. A special Commission will assess the requests and compliance with the constraints and requirements provided by the regulations.</p>
<p>POSSIBLE TRAINING ACTIVITIES LEADING UP TO THE ASSESSMENT OF INITIAL KNOWLEDGE.</p>	<p>For first-year students, in order to facilitate passing the knowledge assessment test and begin the university journey without any educational obligations, it is recommended to attend the Mathematics Pre-course. For information on how the Pre-course for the academic year 2024/2025 will be conducted, please refer to the orientation pages on the University's website.</p>
<p>ORIENTATION, ENROLLMENT PROCEDURE AND OTHER ADMINISTRATIVE ASPECTS</p>	<p>The INFOSTUDENTI</p> <p>Service is a web application that provides a communication channel through which students or potential students can obtain useful information by contacting the various offices of the University (Student Offices, Right to Study and Student Services, Counseling and Placement, Academic Offices and International Relations).</p> <p>With this system, it will be possible to send queries and receive the relevant answers by also attaching documents and monitoring the status of one's request.</p> <p>You can access the service at the following link:</p> <p>https://www.uninsubria.it/servizi/infostudenti-servizio-informazioni-gli-studenti</p>

II. STUDY PLAN

PROGRAMMED TEACHING - COHORT 2024/2025

Programmed teaching refers to the set of courses planned for the entire academic path, which must be completed by all students who enroll in the indicated academic year (Enrollment Cohort) in order to complete the training path and obtain the degree.

Full-time committed students

Careful reading of the exam syllabi is recommended, where any prerequisites and minimum required knowledge are listed.

3 CFU in the third year, to be chosen between the internship or other training activities organized by the Department of Economics or other departments of the University. For the internship, please refer to the Regulations for curricular internships: https://www.uninsubria.it/sites/default/files/Documenti_Orientamento/RegTirociniDiECO.pdf.

** 12 CFU in the third year, to be chosen between the courses offered by the degree program and not already selected in the compulsory courses, or any course activated by the Department of Economics or other departments of the University.

1 Hours delivered in person. 2 Hours delivered in remote mode. Remote teaching will be delivered, for a percentage of not less than 60% of CFU/hours, through live synchronous video lessons (streaming) and, for a percentage not exceeding 40%, through materials available on the e-learning platform that can be accessed asynchronously, such as recorded lessons, video clips, case studies/in-depth materials, assignments, group work, self-assessment tests, glossaries, forums, etc. 3 Hours delivered in remote mode, through live video lessons (streaming).

*G – JUDGMENT V – EXAM I – SUITABILITY F – FREQUENCY

A careful reading of the examination programs (syllabi) is recommended, where any prerequisites and minimum required knowledge are specified.

* 3 ECTS in the third year to choose between the Internship or other training activities organized by the Department of Economics or other Departments of the University.

For the Internship, please refer to the Regulation of curricular internships:

** 12 ECTS in the fourth year to choose among the courses offered by the Degree Programme and not already chosen in the selection of mandatory courses, or any course activated by the Department of Economics or other Departments of the University.

1. Hours delivered in person.
2. Hours delivered via telematic mode. Telematic teaching will be delivered, for a share of ECTS/hours not less than 60%, through synchronous live streaming video lessons and, for a share not exceeding 40%, through materials available on the e-learning platform for asynchronous use such as: recorded lessons, video pills, case studies/enrichment materials, assignments, group work, self-assessment tests, glossaries, forums, etc.
3. Hours delivered through telematic mode, through live streaming video lessons.

III. RULES ON TRAINING PATH

At the time of enrollment, the student can choose between full-time and part-time commitment. The choice can be changed in the following years, but within the last year of the current enrollment. The choice cannot be reversed during the academic year.

Also at the time of enrollment, the student must choose to enroll in one of the two degree classes for which the study program is activated (L-18 - Economics and Business Management Sciences and L-33 - Economic Sciences), in order to choose the class within which he or she intends to obtain the degree. This choice must be confirmed or changed at each subsequent enrollment, becoming final at the time of enrollment in the third year (fourth year for part-time students).

PROPAEDEUTICITY

The propaedeutic courses serve the dual function of directing students towards a gradual and harmonious learning of the course content and of enforcing respect for graduation timelines as much as possible

FULL-TIME COMMITTED STUDENTS

The transition from the first to the second year is subject to the achievement of at least 30 CFU by the September 2025 exam session (included). A student who achieves 30 CFUs but has not passed all exams in the first year can enroll in the second year and take the relative exams, respecting the following prerequisites between exams in the first and second year.

Unsustainable Teaching (2nd year)	If one has not completed the teaching of (1st year):
- Quantitative methods (Mod. 2 Mathematics II)	- Mathematics I
- Accounting and balance sheet	- Management
- Business law	- Private law

To pass from the second to the third year, it is required to pass all exams from the first year and achieve at least 30 ECTS from the second year by the September 2026 exam session (included).

PART-TIME DEDICATED STUDENTS

The transition from the first to the second year is subject to obtaining at least 25 CFU by the September 2025 session (included). A student who achieves 25 CFU, but has not passed all exams in the first year, can enroll in the second year and take the respective exams, respecting the following prerequisites between exams of the first and second year:

Unsustainable Teaching (2nd year)	If you have not passed the teaching of the 1st year:
- Accounting and balance sheet	- Management

For the transition from the second to the third year, passing all exams of the first year and obtaining at least 18 CFUs by the September 2026 exam session (inclusive) is required. Furthermore, the following prerequisites must be met in order to take the exam.:

Unsustainable Teaching (3rd year)	If you have not passed the teaching of the 2st year:
- - Commercial law	- Private Law

RECOGNITION OF LANGUAGE AND COMPUTER CERTIFICATIONS

Students who already hold a certification attesting to level B2 proficiency in the English language can apply for validation at the Student Office.

Certifications obtained in the last five years from the date of validation application are eligible for recognition (as decided by the Department Council on May 28, 2018 and subsequently confirmed on May 27, 2019), with the exception of IELTS, TOEFL IBT, TOEFL CBT, and TOEFL PBT certifications which, by law, have a validity of two years.

Recognized certifications include:

- First Certificate in English (FCE)
- International English Language Testing System (IELTS)
- Trinity College of London: ISE II
- TOEFL IBT (Internet Based Test)
- TOEFL CBT (Computer Based Test)
- TOEFL PBT (Paper Based Test) • Business English Certificate (BEC Higher)
 - International Certificate in Financial English (ICFE)
 - Certificate in English for International Business and Trade (CEIBT)
 - Certificate in Advanced English (CAE)
 - Certificate of Proficiency in English (CPE)

The list of certifications with the corresponding grades (in thirtieths) is available online on the study course's web pages.

A student holding one of the following second language certifications can apply for validation at the Student Office and obtain recognition in the curriculum as a substitute activity for the internship. (3 ECTS):

Lingua francese

- Delf B1 corrispondente a Delf A3 + A4
- DFP B1

Lingua spagnola

- Cervantes B1 Nivel Inicial

Lingua tedesca

- Goethe Institut: Zertifikat Deutsch

Recognition of other certifications

Students holding the Certification "e4Job - Digital Culture for Work" can apply for validation at the Student Office for the recognition of the exam "Information Systems and Soft Skills for the Digital Enterprise" (6 ECTS credits). An eligibility will be granted upon recognition.

RECOGNITION OF PROFESSIONAL SKILLS OR EXAMS PASSED IN PREVIOUS CAREER

In case of enrollment with a request for recognition of previous career, the Department, taking into account the specific educational objectives of the study program and, in any case, respecting the educational constraints established by the current Teaching Regulations of the course itself, ensures the recognition of the highest possible number of ECTS credits. For the purpose of recognition, interviews or examination tests may be carried out to assess the actual level of knowledge possessed.

Some exams may be partially recognized; in this case, the student will be asked to complete the missing part of the program, following an agreement with the teacher in charge of the course. Supplementary exams can be taken, after the student enrolls, only in the session dedicated to exams and not during partial examination sessions.

The Department considers ECTS credits acquired more than 10 years prior to the validation request as outdated, therefore in this case it does not adopt recognition resolutions, nor verification systems and/or supplementary exams.

Thanks to the Convention in place with the Order of Chartered Accountants and Accounting Experts of Varese, CLEMISDI graduates (who have included the exam of Programming and Control or Management Control in their study plan) are exempt from the first test of the State Exam for access to the profession of Accountant.

Furthermore, thanks to the agreements in place with the Order of Chartered Accountants and Accounting Experts of Varese and with the Order of Labor Consultants of Varese, it is possible to carry out a professional internship for 6 months in the final year of the course, under the supervision of a professional registered with the Order. The internship through the Order of Chartered Accountants and Accounting Experts of Varese is only allowed for CLEMISDI students who have included the exam of Programming and Control or Management Control in their study plan.

FREQUENCY OBLIGATIONS: NOT SPECIFIED Frequency, although not mandatory, is strongly recommended.

It is worth noting that it is possible to attend classes even if the enrollment process has not been completed yet. However, in order to access educational services such as e-learning tools, email, and the ESSE3 application for managing university careers, attendance is required. Translate to English: university credentials. It is therefore advisable to proceed quickly with the enrollment, so that the process can be completed in time for the start of classes.

Enrollment in subsequent years after the first

Transition from 1st to 2nd year

The transition from the first to the second year is subject to obtaining at least 30 ECTS credits (25 ECTS credits for part-time students) by the September exam of the year following enrollment. Therefore, students who enroll for the academic year 2024/2025 will be able to access the second year if they have obtained at least 30 ECTS credits (25 ECTS credits for part-time students) related to first-year exams by September 2025 (inclusive).

Transition from 2nd to 3rd year

For the transition from the second to the third year, passing all first-year exams and achieving at least 30 ECTS credits from the second year (18 ECTS credits for part-time students) by the September 2026 exam (inclusive) is required.

METHODS FOR TRANSFERRING FROM OTHER STUDY PROGRAMS

In case of transfer from another University, or from another course of study, the Department, taking into account the specific educational objectives of the course of study and, in any case, respecting the educational constraints established by the current Educational Regulations of the course itself, ensures the recognition of the maximum number of CFUs already obtained by students. For the purpose of recognition, interviews or requests for verification tests may be carried out to assess the actual level of knowledge possessed.

In the case of transfer of students from one course of study to another, belonging to the same Classes L-18 or L-33 and characterized by substantial homogeneity of educational paths, the percentage of CFUs related to the same scientific-disciplinary sector directly recognized to students cannot be less than 50% of those already obtained. The evaluation, in each of the cases represented, is carried out by the Department's student practices Commission.

Some exams may be partially recognized; in this case, the student will be asked to complete the missing part of the program, subject to agreement with the teacher in charge of the course. The integrative exams can be taken, after enrollment by the student, only in the session dedicated to exams and not during the partial exam sessions. The Department considers CFUs acquired more than 10 years prior to the validation request to be obsolete, therefore in such cases it does not adopt recognition resolutions, nor verification systems and/or integrative exams..

RULES FOR THE PRESENTATION OF STUDY PLANS AND INDIVIDUAL STUDY PLANS

Students must submit their study plan online in their third year to indicate their choice of optional courses, elective courses, and internship or alternative activities. Part-time students must submit their study plan online in their third year to indicate their choice of internship or alternative activities, and in their fourth year to indicate their choice of optional courses and elective courses.

The AIQUA Commission of the Degree Course will organize informational meetings to help students choose their optional and elective exams. Study plans that conform to the educational offer included in the ministerial database are automatically approved, following the procedure established by the Student Services Office Regulations.

Alternatively, students may submit an individual study plan (using the specific form provided by the Student Services Office), as long as it is consistent with their cultural project and appropriate to the educational objectives and specific contents of the Degree Course in Economics and Management of Innovation and Sustainability - Integrated Digital. The individual study plan, which must always comply with the minimum ECTS credits in the various disciplinary areas established by the educational regulations, is subject to approval by the course coordinator. If courses offered by the Master's Degree Programs in the Department of Economics are included, it is preferable that these are not designated as mandatory in the study plans of the respective Master's Degree Programs.

Extra teachings

If the student includes in the study plan additional teachings, in addition to those required to obtain the degree, they are considered extra. The credits obtained as a result of exams taken for additional teachings beyond those counted for the degree remain recorded in the student's academic record and may be subject to further recognition in accordance with current regulations. The grades obtained are not included in the calculation of the average grades of the examinations (Art. 20, paragraph 5 of the University Teaching Regulations).

In order to facilitate enrollment in master's degree programs, students enrolled in a study program can include in their study plan no more than two additional teachings beyond those required to obtain the degree. The credits and grades obtained for the additional teachings are not included in the calculation of the average grades of the exams but are recorded in the academic record (Art. 21 of the University Regulations for Students).
